pavers@xeripave.com

The flexibility of Xeripave pervious pavers makes it the right choice for just about any application. Consider these options:

Xeripave can be used as strip drains in parking areas, giving you a cost effective alternate to porous asphalt, and an area with better flow rates, which needs much less maintenance after installation

Dog parks, green roofs, rain water collection systems, walking paths, just about anything you can think of, where you need a water permeable, yet hard surface for urban living and modern development. Xeripave is adaptable and efficient!

Xeripave can also be retrofitted into existing stormwater drains and grates, providing you with 100% removal of gross pollutants, and effective flow through rates
